

Building on My Strengths

Every child is unique and has their own strengths. As teachers and service providers, it's important to know about a student's strengths so we can help them grow and thrive.

Why is this important?

Understanding the various learning needs of our students helps us to be proactive in how we present information, engage our students and remove potential barriers. Use the information to intentionally find ways to build our understanding of learner variability and design learning to be accessible to the student.

Student's Name:

Student's Grade:

Strengths

What does this student do well?

Preferences

This student learns best when...

This student communicates best when...

This student engages with others best when...

Building on My Strengths

Student's Name:

Student's Grade:

Interests

What does this student enjoy and like to do?

Needs

What teaching strategies work best when supporting this student to increase their independence? *This information should be included on the student's present levels page.*
